A tutorial to open a command prompt in a fast way...

This tutorial explains how to set up Windows in order to have a menu entry "Command prompt here..." on right-click on a folder.

- Open the registry editor regedit
- From the key "HKEY\_CLASSES\_ROOT\Folder\shell", create a sub-key named "Command prompt here...", that is to say "HKEY\_CLASSES\_ROOT\Folder\shell\Command prompt here..."
- A partir de l'entrée "HKEY\_CLASSES\_ROOT\Folder\shell\ouvrir avec cmd.exe" nouvellement créée, ajoutez une entrée "command", soit : "HKEY\_CLASSES\_ROOT\Folder\shell\ouvrir avec cmd.exe\command"
- Attribuez-lui le type REG\_SZ et la valeur "cmd.exe /K cd %1"

You can download [HERE](#) a .reg file that does this registry modification automatically.
